My goal is to obtain a position in which my Netsuite Development skills will be a great asset for a company in need.

PROFESSIONAL EXPERIENCE

GoExpedi | Houston, TX
03/2021 - 12/2022

Netsuite Developer

- Developed different solutions and scripts via SuiteScript 1.0 and 2.0 to handle business requirements.
- Integrated with third party systems using Suitelets, Restlets, User Events, Client, and Map/Reduce scripts to accomplish automated tasks.
- Utilized HTML and CSS as needed to provide front end solutions on Suitelets to accommodate our customers with a more easy to read interface for certain solutions.
- Integrate Netsuite with different third party vendors using Suitescript and REST API methods to accomplish business needs.

Hub Promotional Group | Remote
02/2019 - 03/2021

Sr. Web and Netsuite Developer

- Developed solutions using SuiteScript 1.0 and 2.0 for Netsuite workflow problems and needs.
- Created API functionality using Suitelets to serve as a middleware between Netsuite and third party services.
- Developed front end solutions via the ASP.NET framework to allow users to interact with our Netsuite ERP via a user friendly design.
- Setup and manage AWS instances for our various .NET applications and middleware services.

Primary Arms LLC | Houston, TX
01/2018 - 02/2019

Sr. Front End Web Developer

- Fixing and debugging issues related to our eCommerce store on NetSuite and SuiteCommerce Advanced.
- Added new SuiteScript on the backend to provide an 'API'-like service to our front end code with the help of SuiteScript models and services.
- Implement new features to the store to help marketing needs, using HTML5, CSS (SASS),

and Javacript (Backbone.js).

- Coordinate with the India offshore team to discuss testing procedures and update on progress for current projects remotely.

Software Decisions | Houston, TX

08/2017 - 12/2017

Front End Web Developer

- Worked at home fixing website bugs and troubleshooting issues for various third parties.
- Implemented new features as they came in using Angular 2, HTML5, and CSS.

Primary Arms LLC | Houston, TX

05/2017 - 08/2017

Front End Web Developer

- Fixing and debugging issues related to our eCommerce store on NetSuite and SuiteCommerce Advanced.
- Implement new features to the store to help marketing needs, using HTML5, CSS (SASS), and Javacript (Backbone.js).
- Coordinate with the India offshore team to discuss testing procedures and update on progress for current projects remotely.

Berryville Holdings | Remote

02/2016 - 01/2017

Front End Web Developer/UI/UX Web Developer

- I handled maintaining and adding new features to the web interface of our VPN software. This included using Angular2, HTML5, and CSS3 as the software was built with these technologies.
- Created individual applications using Javascript that talked with the backend database for our product using JSON and MySQL. Used Node.js to spawn local development servers to build Angular2 applications for our web software.
- Tested both the individual and company-wide applications for bugs and functionality. I resolved any bugs associated with the client for planned releases.
- Handled the user interface and user experience development with Bootstrap for styling as well as some Material design concepts.

Novatex Solutions | Sugar Land, TX

05/2014 - 01/2016

Front End Web Developer/UI/UX Web Developer

- In charge of the general markup of our clients' website and user experience designs to help build their brand. This consisted of using current trends and proven technologies, including: HTML5, CSS3, AngularJS, and more.
- Tested our clients' website using a variety of hardware and tools to make sure our projects worked well with our target audience.
- Built small AngularJS applications that utilized JSON and MySql for communicating with the backend and manipulating the data on the front end.
- Responsible for mocking up the client's website to show the client how their website would be laid out with descriptions on why it will help their business and visitors. This included using proven UI designs in which their visitors would be accustomed with and efficient

animations to properly cue the visitors.
